STATIONARY COMPACTOR

P100 - P1000

COMPACT CUSTOM-MADE SOLUTION FOR DRY WASTE

The stationary compactor consists of two separable units, allowing the full container to be easily replaced with an empty one without prolonged interruption of machine operation.
These robust compactors combine high compaction force with a compact footprint thanks to their cross-cylinder design.
They are specifically developed to process large volumes of waste and feature a wide loading aperture for easy loading of bulky materials.
Our stationary compactors are custom-designed to meet the specific requirements of each customer.

Compact dimensions

Large loading aperture

Tailor-made solution

CHOOSE OUR EQUIPMENT

Proven Industry Expertise
Since 1964, our companies have been among the leading manufacturers of high-quality balers and compactors in France and internationally. We have extensive experience working with manufacturers, retail chains, waste management professionals, and local authorities.

Tailor-made solutions
Our sales team and engineering department manage each project individually in order to provide the equipment best suited to your requirements. Our machines can be customized with numerous options such as bin lifters, different container sizes, and more.

Efficient after-sales service
We are the leading after-sales service provider for compaction equipment in France and offer dedicated international support solutions. Wherever you are in the world, we provide delivery, installation, maintenance, and repair services for your equipment.

Part of the Sulo Group
Since 2020, our companies have been part of the French Sulo Group. Sulo is a global leader in waste management and recycling solutions and the European leader in pre-collection waste solutions.

BENEFITS FOR YOU

Profitability
Ability to resell compacted waste and optimize transport capacity, resulting in reduced logistics costs.

Productivity
Thanks to our semi-automatic and automatic systems, your teams spend less time managing waste and can focus on other operational tasks.

Enhanced CSR commitment
Reduction of CO_2 emissions through fewer waste collections and improved waste sorting at source.

Optimized Working Environment
Space savings, cleaner operating areas, and reduced accident risks.

STATIONARY COMPACTOR

P100 - P1000

COMPACT CUSTOM-MADE SOLUTION FOR DRY WASTE

- **Processed Materials :** Suitable for all types of waste (excluding wood, rubble, and scrap metal).
- **Reliable & Durable** : Thanks to their proven technology and robust design, the P100–P1000 range offers a long service life even under intensive use. High-quality materials such as abrasion-resistant Creusabro steel and reinforced intermediate steel plates ensure outstanding durability.
- **Compact design** : The cross-cylinder system minimizes floor space requirements while maintaining high compaction performance.
- **Easy of use** : Compaction cycles are manually activated when waste is loaded. Alerts inform operators of the fill level, making collection scheduling easier.
- **Easy loading** : The large loading aperture allows easy loading of waste, including bulky materials.
- **High performance** : Optimized cycle times ensure rapid processing of large waste volumes.
- **Safety ensured** : Our machines comply with CE, AFNOR, and INRS standards. Operator and component safety is ensured through an emergency stop system in case of malfunction and continuous electronic monitoring of ram position. Additional safety options are available, including safety cages, light barriers, badge access systems, keypad access, etc.

TECHNICAL SPECIFICATIONS*

	P100	P1000
Hopper opening (mm)	1500x1500	1500x1500
Compaction chamber volume (m3)	2.44	2.44
Ram height (mm)	600	600
Ram depth (mm)	230	230
Cycle time (s)	44	34
Volume per cycle (m3)	1.3	1.3
Maximum hourly throughput (m3)	106	138
Compaction force (T)	28	34
Compaction pressure (kg/cm²)	3.1	3.8
Main motor power (kW)	7.5	7.5
Hydraulic oil tank capacity (l)	60	110
Unladen weight (kg)	2050	2490
Supply voltage (V)	400	400

DIMENSIONS

	P100	P1000
Length (mm)	2580	2580
Width (mm)	1926	1926
Height (mm)	1530	1530

We reserve the right to modify specifications without prior notice.

Wall connection and conveyor

Manual loading from a dock

Ground-level bin lifter loading

Configurations & options

Stationary compactors can be fully customized with a wide range of configurations (ground level, dock, platform, wall connection ...), loading methods (manual, bin lifter, forklift ...), and options (hopper size, motor power, container volume from 15 to 45m³, remote control operation, rail systems, custom RAL color etc.).
